

Taq DNA Polymerase Kit

Enzymes and Reagents

PCR | qPCR | RT | Kits | Oligonucleotides

Performance

Empirical's Taq DNA Polymerase is a recombinant Taq that has identical characteristics to native Taq from *Thermus aquaticus*. The enzyme consists of a single polypeptide with a molecular weight of approximately 94 kDA, and will create products with dA overhangs at 3' ends.

Empirical's Taq DNA Polymerase offers consistent activity from lot-to-lot. Three independent lots were compared using PCR reactions that produce a 1kb amplicon from *E. coli* DNA. Empirical's Taq DNA Polymerase was added at 2.5, 1.25, 0.625 and 0.3125 units per reaction.

Empirical's Taq DNA Polymerase is more sensitive. It and a leading competitor's Taq polymerase were used in an endpoint PCR reaction producing a 1kb amplicon from *E. coli* DNA using serially diluted enzyme concentrations.

Features

- Robust Performance
- High Yielding Polymerase
- Low False Positive Rate
- Lot-to-Lot Consistency

Available in Bulk and OEM Volumes

Item Number	Units
TP-KIT-500	500
TP-KIT-1000	1000
TP-KIT-2500	2500
TP-KIT-5000	5000

Lyo Ready Formulation

- Available in Glycerol Free and Lyophilization Ready

Kit Contains

- TAQ Polymerase
- 10X Reaction Buffer with MgCl₂
- 10X Reaction Buffer Without MgCl₂
- 25mM MgCl₂ Solution
- 6X Mean Green Loading Dye

Related Products

- Deoxynucleotide Solution Mix, 10mM each
- Deoxynucleotide Solution Set, 100mM each
- EasyLoad™ Low-Range DNA Ladder
- EasyLoad™ Mid-Range DNA Ladder
- EasyLoad™ High-Range DNA Ladder
- MeanGreen™ 6X Loading Dye
- MeanGreen™ 5X Buffer
